Curlers Make Merry at Annual Banquet -- Kerr of Bellevue President; M. Congdon Vice President

At the annual meeting of Crows Nest Pass Curling Association held on Thursday evening in the Grand Union hotel, the following officers and executive committee for the ensuing year were appointed: President, Wm. Kerr; vice-president, Milt Congdon; secretary-treasurer, L. S. Herchmer; executive, R. Uphill, S. Moores, R. Rinaldi, Dr. Key, A. Allison and W. Day.

Invitations were extended from Pincher Creek, Fernie and Bellevue to hold next year's bonspiel. Rev. R. Upton extended the invitation for Bellevue, and that town was decided on by open vote.

Following the business meeting, at which Sam Moores presided, the program of toasts and miscellaneous selections proved very enjoyable, all present being in such a happy mood it added to the hilarity. Mr. George Kellock was chairman, and the

following contributed to the entertainment:

A. B. McMurdo and Mr. Taysom, of Pincher Creek, in songs and duets; Scottish Airs, by Pipe Major Moore; cartoons and monologue by Andy Thornber; song by E. K. Stewart; piano accompaniment by Harry King; and the following toasts:

"The King," "The Crows Nest Curling Association," proposed by R. W. Greenway, Lethbridge, responded to by Thos. Beck, Fernie; "The Visitors," proposed by G. Kellock, responded to by W. A. Day, Macleod.

The dinner served by the Grand Union elicited expressions of appreciation, and so crowded was the dining room that a few late-comers were accommodated in the kitchen. It was voted one of the most enjoyable banquets in the history of the association, and made a splendid climax to the 27th annual bonspiel.

The prizes and trophies were won by the following:

Grand Challenge: Day, Macleod; runner-up, Morgan, Blairmore.

International Cup: Kerr, Blairmore; runner-up, Day, Macleod. West Canadian: Kerr, Blairmore; runner-up, Cousins, Coleman.

Lethbridge Brewery: To be decided between Allison, of Pincher Creek, Day, of Macleod, and Greenway, of Lethbridge, at the Macleod arena.

Trites Woods: To be played between Sanborn and Beck at the Fernie arena.

Wrestlers Here on Saturday

Frank Barringham is a dead game sport. He is staging another wrestling card on Saturday night in the community hall, with top-notch men seldom seen in action outside of the cities.

Danny Dusek, 215 lbs., will wrestle George Maloney, 210 lbs., and Dave Johnson, 208 lbs., vs. Laverne Baxter, 225 lbs., will be the other main attraction. The best two of three falls, and a one hour limit on each bout should provide plenty of action.

As a preliminary "Pop-Eye" will meet "Poop Deck Pappy" in a fight-to-a-finish, in which neither contestant will show any mercy. 8.30 is the starting time.

Attended Grocers' Convention

Mr. and Mrs. J. M. Allan attended the annual convention of Associated Grocers at the Paliser hotel, Calgary, last week, which was one of the most successful in the history of the organization. Some twelve years ago it was started by a group of Calgary grocers for the purpose of securing benefits of co-operative buying in order to pass along savings to customers and to secure the highest qualities in goods. The organization now has many members throughout Alberta, all leaders in the retail grocery business. Coleman Cash Grocery, of which Mr. Allan is proprietor, is in its 23rd year, and about six years ago Mr. Allan became a member of Associated Grocers.

Mr. and Mrs. Jack Chalmers, Mrs. Geo. Graham and Miss Mae Bell were Calgary visitors.

National Advertisers Use Weeklies

Referring to advertising in The Journal, considerable outside display advertising is carried, placed by national advertising agencies for manufacturers of widely-known products. This brings outside money to Coleman, and also advertises products for which there are local dealers. It will be noticed that these advertisements are conspicuous by their style, white spacing being given as much prominence as the actual wording. These advertisements are prepared by men with wide experience, and are carried in hundreds of weekly newspapers throughout Canada.

Nazarene Mission

An old time gospel mission on Main street, west. Missionaries: C. Helen Mooshian and Gunnell Berglund.

Sunday morning worship at 11. Sunday school at 1 p.m. Special contact between the boys and girls. Evangelistic service at 7.30 p.m. Special music.

Week days, Tuesday at 7.30 p.m., prayer, praise and testimony meeting. Friday at 7.30 p.m., gospel service.

To-night there will be a special service with Rev. Nelson Z. Woodruff of Pincher Creek, as the special speaker.

Strangers and visitors always welcome. Bring your friends to hear the old-fashioned gospel.

A hockey fan cautioned us against printing any more posters advertising games on green paper. He stated that the only home games Coleman lost were those advertised on green paper.

In our rounds we called at Hang Wang's laundry, and left him a blotter, telling him it would be useful to blot his letters. He looked at us questioningly, and replied: "My bladder, no—he in old country!"

School Trustees Convention Next Week

Widespread Interest Anticipated Over Curriculum and Its Increased Cost to School Districts

Calgary will be the gathering point for possibly 800 representatives of Alberta school districts on Feb. 23-24. From the Crows Nest Pass School Trustees Association there will likely be representation of every district in the Pass towns, including W. H. Chappell, the secretary of the association, who for many years has been active in school affairs.

Among the important matters to be discussed is the change in the curriculum which has resulted in greatly increased cost to schools. Another topic which will excite keen discussion is the merging of smaller school districts into larger districts. There have been several protests made against the change, and the convention next week will provide full opportunity for hearing reasons for and against.

Chinese Organizing Relief Fund

The Chinese of the Pass towns are organizing an appeal for relief for their countrymen who are suffering from the aggressive and unwarranted war being carried on by Japan.

They will make a collection at the bank on the next pay day, besides taking other steps to raise funds. The committee for the Pass towns includes Joe Frank Mah, Blairmore, president; Zeke Quong, Coleman, secretary; Ben Chow, Coleman, treasurer; and Herbert Mah of Blairmore. There are about 55 Chinese in the Pass towns, who will assist in the appeal for funds. A speaker is also expected to address a public meeting on Feb. 8 in Sartoria's hall, Blairmore.

G. E. Cahoon and Harold H. Blackmore of Cardston, were here on Wednesday of last week making a survey in contemplation of holding a mission here for the Mormon church.

Town Council Notes

Meeting on Monday, Jan. 24, in the council chamber. Present were Deputy Mayor Borrows, Councillors Haysom, Allan and Plante.

Advertisement re purchasing dog licenses was ordered to be inserted in The Journal.

A relief case was discussed and settlement made.

Special Train Proposed for Lethbridge Feb. 12

To enable Coleman people and others from the Pass towns to go the game at Lethbridge on Feb. 12 between Canadians and Maple Leafs, Bill Gate is negotiating with the C.P.R. for excursion rates. It is the final game in the Kootenay league schedule between these two teams.

It is proposed to have additional coaches attached to the 2.20 p.m. regular train, and these coaches attached to a through freight arriving from Lethbridge at 1 a.m., returning at Coleman about 7 a.m.

C. P. R. Agent MacKinnon was of the opinion that if not less than 120 passengers were guaranteed, it was likely a special train would be run, and the fare reduced below the regular \$2.30 fare for that week-end.

The Grand Union hotel will accept bookings, which must be made by Saturday, Feb. 5. Cash must accompany bookings and reservations will also be made for seats at the Lethbridge rink.

Considering Nominations For Municipal Elections

Meetings of the miners association executive, it is reported, have decided to nominate candidates for the time-expired vacancies on the council and school board. Nothing definite has been obtained for publication up till to-day. Suggestions have been made that the business section and the miners might agree to have equal representation on both bodies. In this way it might be possible to return candidates by acclamation in view of there being no contentious issues.

Burns Anniversary Supper Friday Night

Coleman Caledonian Society will hold its annual gathering on Friday evening in the Oddfellows hall, which will be presided over by Mr. George Kellock, and the speakers will include Mr. John Kerr of Passburg, Rev. A. E. Larke of Blairmore, Rev. J. T. Dunbar, Rev. J. H. Beven and local members of the society. Arrangements have been made to seat 125 at the supper, which will be followed by a dance.

Mrs. M. Brennen has been a hospital patient for the past week and is now making rapid recovery.

EARNINGS NOT SO HEAVY

It is true that net earnings of the oil industry are showing improvement, but never have they been on the huge scale so often claimed by the uninformed.

For the 16-year period from 1921 to 1936, the average capital investment in the industry was \$10,776,928,000 and on this the average earnings were \$154,336,580. This average return was at the rate of 1.43 per cent per year.

Even in 1935, when earnings in the industry took a sharp turn for the better, the yield was only 2.54 per cent.

Earnings have not exceeded five per cent in any year since 1931 and for three out of the five years since that time there have been deficits.

Although the industry has steadily expanded, the factors of increased competition, low prices, obsolescence of equipment, and mounting taxes, have kept the earnings at a low level.

PEE-WEE HOCKEY GAMES

JAN 31—Elks vs. Slovaks.
FEB. 3—Italian Society vs. Slovaks.
FEB. 7—Pattinson's vs. Polish Society, (watch for next week's games)

Still in The Running for Play-Offs With 12 Points

Canadians Confident of Winning Sufficient Points in Remaining Eight Games to Qualify

Though Canadians played valiantly against Kimberley Dynamiters last week, this powerful team defeated Coleman twice by scores of 5-2 and 6-3. Kimberley's power play was used to the limit when Coleman had men in the penalty box, their checkerboard play being most effective and spectacular. Kimberley's victories lessened Canadians chances of entering the play-offs, and on Saturday evening Lethbridge defeated Kimberley, placing the Maple Leafs further up the ladder.

On Tuesday evening Coleman won a stiff game against Nelson by a score of 4-2. Joyce sparked the team to victory with one goal and two assists. Other snipers for the locals were Lopicuk, Jempeon and Bill Fraser.

Both teams opened listlessly and it was only after J. Smith had put Nelson ahead that Canadians finally found their bearings; Joyce and Lopicuk combined to score and draw level with the Leafs. Two penalties were handed out in this period, N. Smith and Landiak getting two minutes each.

Joyce put Canadians ahead early in the second period on a solo effort when he outguessed the entire Nelson team. Carr put his team on even terms with a goal, taking advantage of Lopicuk being sent to the cooler. Jempeon put Canadians ahead again when he rushed in to take a perfect pass from Bill Fraser to score. Seven penalties were imposed in this period when the game started to get rough, the referees taking this means of keeping the game under control. Joyce and W. Fraser scored Canadians' fourth goal with less than a minute to go when Joyce broke away from a power play to test Seaby. Bill Fraser following behind was in position to take the rebound to score.

Coleman travel to Kimberley on Saturday for their last appearance in that town this season. On Tuesday evening they play Trail at Coleman and on Wednesday they leave on their last trip around the circuit, play Rossland on Thursday, Trail on Friday and Nelson on Saturday.

Excels Drub Pincher 10-3

Coleman Excels have shown a sharp reversal of form during the week when they overwhelmed Pincher Creek on Wednesday night by a 10-3 score and on Monday evening invaded the lair of Blairmore Bearcats and tagged a 5-4 score on the league leaders.

Pavlus and Fields were the leading marksmen for Excels on Wednesday evening, each scoring three goals. Brown had two and several assists.

Pincher never threatened after the first period when they kept on equal terms at 2-2. Excels ran wild in the second with four goals, and in the third outscored their opponents four to one.

A popular feature to inter-mediate games is the staging of Pee Wee hockey games. On Wednesday night Pattinson's defeated Italian Society 1-0 on a goal scored in the dying minutes of play by "Busher Jackson" Naylor.

Mrs. Ferguson of Fernie is the guest of Mrs. Russell Ferguson.

NOTICE

JELL-O ICE CREAM POWDER

Testing Time For Radio

Much is likely to be heard at the pending session of Parliament on the subject of the problems of radio broadcasting in Canada and the policies pursued by the Infant Canadian Broadcasting Corporation.

Born in September, 1936, the C.B.C. has been operating now for over a year and it is now possible to discern to some extent the direction in which it is tending and to compare its announced objectives when it was organized with its achievements to date, and there is every indication that this will be done when members of Parliament get an opportunity to overhaul the system and review first year policies and practices.

That there will be conflicting viewpoints and wide variations of opinions as to the success or otherwise of nationalized broadcasting as practised under the new management is a foregone conclusion; and this is to be expected when it is remembered that the tastes and opinions of the "customers" differ tremendously, not only in different parts of the country, but within the confines of every community and even in the same household.

To Canvas All Phases

In the overhauling process all phases of Canadian radio broadcasting are destined to come under review, including choice and quality and range of programs, the sources of programs and their effect on the promotion and development of Canadian talent, the revenues and expenditures of the Canadian Broadcasting Corporation, the question of competition with other advertising media and generally, the future of radio broadcasting in this country.

During the discussions likely to ensue frequent reference will undoubtedly be made to the avowed objectives of nationalized radio broadcasting in this country, broadly outlined in a recent issue of the Financial Post as: "(1) To develop purely Canadian programmes of high standard which stem from Americanization of the air in Canada; and (2) To extend radio facilities to all parts of the country."

If the Financial Post has correctly diagnosed these objectives they will unquestionably be used as yardsticks to measure the corporation's achievements to date.

Some Progress Noted

With respect to the latter there will be general agreement that some progress has been made in extension of radio facilities with all parts of the country as the ultimate objective, whether or not there is unanimity with respect to details. Physical facilities have been extended on money borrowed from the government and revenue from the \$2 licence fee exacted, in theory at least, from all radio users and additional extensions are projected.

But the other objective, that of building up a Canadian repertoire of programs with all-Canadian talent as its backbone is destined to prove a bone of contention. No matter to what extent radio users do or do not welcome the recent introduction of American broadcasts over C.B.C. facilities, a good deal of criticism of this policy is already in evidence and is concentrated in some quarters as a departure from one of the two principal objectives of the Canadian national system.

Disatisfaction Voted

Testimony to dissatisfaction on this score, both on economic and patriotic grounds, is forthcoming in articles in two of the most powerful Eastern publications in issues published on the same date. The Financial Post and (Toronto) Saturday Night sharply assailed this excursion into American territory for programs for Canadian consumption. In effect they point out that this is a reversal of public policy and state that the American contracts not only result in the weakening of Canadian magazines and daily and weekly newspapers but also weaken the bulwarks of national unity in this country.

Pointing out that contracts have been signed with American advertisers for programs designed to yield the C.B.C. a revenue of \$600,000 for this year, the Financial Post says:

"Not only does such a proposition defeat the very purpose for which this expensive national system was created but it constitutes a direct subsidy to one form of advertising at the expense of other forms. For the C.B.C. could not offer the bargain rates at which this time is being sold unless it were backed by the public purse. And, furthermore, the money being spent by American broadcasters will be directed (in part at least) from other forms of advertising, such as Canadian national publications, newspapers and magazines—publications which not only give employment to Canadians but which are the national bulwarks of unity in this country."

Division Of Revenue

In similar vein on the same subject Saturday Night declared, in part: "Among the advertising media which are directly and seriously affected are both the national periodicals and the daily and weekly newspaper press. There is only a certain amount of money available for nation-wide advertising in Canada and the sum thus diverted into the channel of the Canadian Broadcasting Corporation's system will come largely out of the sum which would otherwise be expended with these periodicals... the transfer of this advertising to another medium involves a definite weakening of the editorial contents of all the affected Canadian periodicals."

These and other aspects of the national radio problem make it clear that the time has arrived when there should be a stock taking and future policies carefully and clearly defined.

England received \$23,365,000 in cent-inflating taxes in the first seven months of 1937.

We never can fathom why photographic slanders us so as we grow older.

Real Friend Of Dominion

Curries' Captain Opened British Market For Canadian Cattle

William Henderson, captain of the Scottish curling team visiting Canada, has more than the interest of a sportsman in this Dominion.

For more than 30 years he battled in Britain to permit the import there of live Canadian cattle, mobilized the opinion of British farmers who wanted to fatten Canadian cattle, and finally won a victory which has meant millions of dollars to Canadian cattlemen.

"Canadian cattle," he recalled, "were being kept out of the British Isles because a shipment received in Dundee in 1892 was supposed to include cattle suffering from pleural pneumonia."

"That is an extremely infectious disease. But it was never really identified in the cattle that were then seized and they were destroyed before anything else could be done about them."

"All Canadian cattle were then debarrued from shipment to Britain unless they were slaughtered immediately at the port of arrival and we farmers of Scotland thought that it was unfair because the disease had never been known in Canada."

"Was it to protect the home growers of cattle that Canadian livestock was held out?" the reporter asked.

"The late Joseph Chamberlain admitted to me that it was really to conciliate the Irish, who were shipping many cattle across the Irish Sea," Mr. Henderson said.

An organization calling itself the Free Importation of Canadian Cattle Association of Great Britain was formed and this continued to battle for the abolition of the fictitious health barriers.

"People used to argue with me," Mr. Henderson said, "that the natural market of Canada was in the United States, but I used to reply that even so Canadian cattle should have free access to the home market."

Duties Were Exacting

Chief Of Meat And Canned Goods Division At Ottawa Retires

After 30 years' service, Dr. Robert Barnes, chief of the Meat and Canned Foods Division, Health of Animals Branch, Dominion Department of Agriculture, has retired on superannuation.

Dr. Barnes came to Canada from Ripplingale, Lincolnshire, England, as a young boy with his parents who settled in Middlesex County, Ontario, where he obtained his early education. He was graduated from the Ontario Veterinary College in 1883.

Throughout the years he carried out his exacting duties in connection with the inspection of the millions of animals slaughtered every year both for consumption as fresh meat and for canning, with thoroughness and efficiency.

Dr. Barnes' two principal hobbies in private life were poultry and dogs and for many years he has been conspicuously and constructively associated with the leading poultry and kennel associations.

His retirement after a long period of useful public service has been well earned and his co-workers and his wide circle of friends throughout the Dominion wish for him many years of good health and enjoyment of his life.

Parcel Was Harmless

Supposed Bomb Turned Out To Be Hair-Curling Powder

A hair-curling story developed at a West Side police station in New York, when a textile company head, brought in a package and remarked excitedly:

"I think it's a bomb!" Police experts gingerly began to examine the package, which contained fourteen small tin-foil packets, filled with a grayish powder. In the open air, the packages began to grow warm. Police summoned the fire department. Then it came out. The powder was to be used in curling women's hair and heats up under certain conditions.

August Grader, a handmaster, left England for America 51 years ago, but took the wrong boat and landed in Capetown, South Africa, where he remained until he died recently at the age of 75.

Inventor of the Metcalfe Indicator for measuring turbine revolutions and of apparatus for coating ships at sea, Captain Henry W. Metcalfe, 73, died recently at Canterbury, Eng.

The Flying Scot

World's Best Known Train In Service For 75 Years

The "Flying Scotsman" has pulled out of King's Cross at 10 a.m. every day for 75 years, but it would surprise regular travellers to learn that for the first 25 there were no third-class carriages! In the beginning it was called the "Special Nine-Hour Express" but in November, 1887, third-class carriages were added and the time speeded up.

The name "Flying Scotsman," coined by a London cable, soon became popular among hansom-cab drivers, and the public took a fancy to it. Later, the train was officially christened. To-day the journey takes seven hours and 20 minutes, and unless the passes in the north are badly snowed up, the train is never a minute late.

The "Flying Scot" is the best-known train in the world, and not only holds the world's long-distance record for many years, but is the only train in Britain to have an all-electric restaurant and a modern hair-dressing saloon.

TAKE YOUR EASE IN DAINTY NEATNESS THAT CAN BE MADE IN NO TIME

By Anne Adams

Rarely Remains Idle

Money Spent By Railways For Materials Kept In Circulation

People are apt to forget that, apart from the direct employment given railway workers in the provision of new equipment, thousands of individuals not on their pay-rolls benefit when the systems give orders for rolling stock.

An official of the C.N.R. has mentioned the fact that that system alone last year bought forest products to the amount of 315,700,000 feet, not all of it by any means utilized in the production of ties. A whole lot of this wood went into the construction and repair of equipment.

And so with other materials of which the railways are the purchasers. When they issue orders for new coaches or locomotives, the firms building rolling stock, together with their employees, benefit, and so do the primary industries which contribute the raw materials.

Not only great employers of labor in the direct sense, the railways are also amongst the mainstays of national industry in the work which is the result of the orders placed by them.

This was seen during the depression years when reduced traffic led to a curtailment of such orders. Many an industry which was accustomed to profit from railway orders felt the pinch. But with the improvement in traffic, there has arisen need for more and better equipment. Millions of dollars are being spent by the railways upon the provision of this equipment, and hundreds of subsidiary industries benefit.

The dollar which is spent upon railway transportation rarely remains idle. It is quickly distributed in wages or in the purchase of supplies, thus spreading activity and prosperity. Brockville Recorder and Times.

Suspended Animation

St. Louis Doctor Claims He Has Halted Life By Frost

Creation of an ultra-frozen state of matter in which life is suspended indefinitely but can be revived again, was announced before the American Association for the Advancement of Science at Indianapolis.

Dr. H. Lloyd, of St. Louis University, declared he had been able to produce suspended animation in plants and some small animals by taking them from room temperature to several hundred degrees below zero within the fraction of a second. Both the plants and animals were brought back to life after their life processes had been stopped by cooling.

These plants and animals were not frozen, Lloyd declared, since freezing destroys living cells. Instead, they were put into a vitreous state by the rapid cooling. A vitreous substance is something like glass, which cools without the formation of crystals.

Discussing the dreams of fiction writers who have suggested the possibility of suspending life in a human being and reviving him 1,000 years later, Lloyd declared such a thing is "theoretically possible," but highly impractical.

Not So Long Ago

Many Of Our Common Things Were Unknown In 1912

Alexander Woolcott, in *Columbiad*, says the man of 1912 had never heard of daylight saving. Nor rayon, jazz, insulin, G-men, nor Soviets. He had never heard of radio, nor seen a talking picture, nor listened to the whirr of an electric ice-box, never seen an animated cartoon, nor a Neon light. His very ideas were different. Twenty-six years ago he thought a job was something any man could get who was willing to work. And war? Why, war was a remote practice carried on only by remote, comic-opera countries in Central America and the Balkans.

The following notice was seen outside a village church:

"The Rev. — will preach here next Sunday morning and evening, after which the church will be closed for necessary repairs."

Not one fatal road accident was reported in the square mile of the city of London in a recent period of 10 weeks.

It is some sort of a criticism of radio talent that right now the most popular thing on the air waves is a ventriloquist's dummy.

"So your daughter's getting married. Is it to be an old-fashioned wedding?"

"Yes, I'm footing the bills."

The food and drink consumed each year by the average man weighs about a ton.

World's Largest Telescope

Will Be Erected On Top Of A California Mountain

A giant steel bearing to support the world's largest telescope atop a California mountain must be imperfect to be perfect. It's a job which engineers at the plant in Philadelphia, building the mounting, won't and can't hurry. George H. Proebel, in charge of the work, said polishing the bearing and journal on which it rides will take at least three months.

"We've got to machine the bearing and polish it to just the right degree of an imperfect circle," Proebel said, "so that when we get the bearing into place and get it assembled the bearing will fall into a perfect circle. We've got to know how imperfect to make it to make it perfect."

"There are 170 tons in the horse-shoe in which the telescope tube will swing, and its own weight through the bearing out of shape." The bearing is 46 feet in diameter.

Proebel said he expected the frame will be ready for shipment next summer.

A New Dairy Queen

Holstein Produced 1232.5 Pounds Of Butter During Year's Test

A new queen of the dairy world, Femco Alma, a purchased Holstein of outstanding butter producing ability, has been crowned in Breckenridge, Minn. By producing 1232.5 pounds of butter during a year's test, Femco Alma became the record holder among junior two-year-old cows of all breeds and the only cow less than that age producing more than 1,250 pounds of butter in 365 days.

Our nearest star is 275,000 miles far away as the sun.

A MISTAKE TO WAIT

WHEN "ACID INDIGESTION" STARTS

CARRY YOUR ALKALIZER WITH YOU ALWAYS

The fastest way to "alkalize" is to carry your alkaliizer with you. That's what thousands do now that genuine Phillips' comes in a flat tin for pocket or purse. Then you are always ready.

Use it this way. Take 2 Phillips' tablets—equal in "alkalizing" effect to 2 teaspoonsful of liquid Phillips' from the bottle. At once you feel "gas," nausea, "over-crowding" from hyper-acidity begin to ease. "Acid headaches," "acid breath," over-acid stomach are corrected at the source. This is the quick way to ease your own distress—avoid offense to others.

Will Seek Power To Amend B.N.A. Act For Insurance Plan

Ottawa.—Constitutional power for the federal parliament to enact a national unemployment insurance system will be sought in a simple amendment to the British North America Act.

Section 91, which lists the matters over which the Dominion has jurisdiction, will be amended by adding to the list "unemployment insurance."

Prime Minister Mackenzie King made public the joint address to the king which he proposes to submit to both the Senate and House of Commons. It was sent Jan. 29 to the nine provincial premiers with a request that they communicate the observations of their governments on the proposal.

Six of the provinces already have given their approval without qualifications, but Alberta, Quebec and New Brunswick are awaiting further information. Details of the proposed bill will not be made known until it is introduced in parliament.

A joint address of both houses of parliament to the king, supported by two-thirds of the provinces, would, it is understood, be sufficient to obtain the necessary amendment in the United Kingdom parliament.

What he would proceed against the wishes of three provinces, however, to obtain their consent later, the prime minister has not indicated. Quebec's Premier Duplessis has indicated his government would not consent to yield any degree of provincial autonomy.

Premier Dymally, of New Brunswick, said he would submit the question to his legislature, while Alberta's delay was to obtain details of the unemployment insurance measure.

Following is the letter sent by Mr. Mackenzie King to the provincial premiers:

"With reference to our previous correspondence, I send to you here with the text of the address to His Majesty which it is proposed to submit to both houses of parliament with respect to an amendment to the British North America Act, empowering the parliament of Canada to enact unemployment insurance legislation. "I should much appreciate receiving, at your early convenience, the observations of the government of the province with respect to the proposed amendment."

Refused Japanese Demand

British Would Not Allow Renewal Of Chinese In Concessions

Shanghai. A dispute between British and Japanese authorities at Tientsin, almost ending in a clash, was reported while Chinese said they had made "further successes" on the Hangchow and Wuhan fronts.

British said Japanese officers at Tientsin demanded Chinese within the British concession be handed over to them.

The British refused. The Japanese then threatened to take the Chinese by force, and the British replied they would resist. The Japanese left the matter rest there, at least temporarily.

At Wuhan, 60 miles up the Yangtze river from Nanking, the Chinese said they had gained "a dominating position over the city" by occupying mountains five miles to the south.

Less Wheat In Store

Shows Sharp Decline From Corresponding Week Last Year

Ottawa.—The Dominion bureau of statistics reported Canadian wheat in store for the week ended Jan. 14 was \$14,917 below the level of the previous week and \$1,226,373 less than the corresponding 1937 week. The week's stocks were 55,817,438 bushels. In the United States there were 4,370,000 bushels of Canadian wheat, a decrease of 156,000 from the previous week. A year before the figure was 25,213,615 bushels. United States wheat in Canada totalled 1,670,818 bushels.

Canadian elevators held 51,447,438 bushels compared with 52,350,351 the previous week and 81,830,126 a year ago. In rail transit were 2,796,385 bushels.

Appealed To People

B.C. Premier Asks Support For Plan To Include Yukon

Vancouver.—Premier T. D. Pattullo, 65 on January 19, marked his birthday dinner celebration with an appeal "to all the people in British Columbia" to support his government's proposal for extension of British Columbia's boundaries to include the Yukon Territory.

"I ask everyone in the province, regardless of his or her politics, to get behind my government in this regard," he said. "We have just had an election, and therefore have about four years to carry out this marvelous project."

"I see no reason why it should not be accomplished within 18 months or two years."

More Building Permits

Figures For December Show Decided Increase Over December 1936

Ottawa.—The Dominion bureau of statistics reported building permits issued in 58 cities in December were valued at \$5,543,073, an increase of \$209,907 compared with \$5,282,166 in December, 1936.

Values of building permits taken out during 1937 were \$55,634,610, an increase of 34.6 per cent, compared with the aggregate of \$41,325,693 in 1936.

By provinces, building permits issued in December with December, 1936, figures in brackets, follow: Manitoba, \$52,000 (\$48,500); Saskatchewan, \$30,841 (\$69,600); Alberta, \$97,779 (\$71,444); British Columbia, \$298,375 (\$164,503).

Will Show Surplus

Finances Of C.B.C. For 1937 Are In Good Shape

Ottawa.—The Canadian Broadcasting Corporation will show a financial surplus when the books for the past year are closed, it was announced today by Transport Minister Howe.

He said there would be a surplus on both revenue and capital accounts. The financial position of CBC is under review at the present time to determine whether the annual license fee of \$2 should be increased. No decision has been made.

If fees were increased, it would be because of the cost of future expansion such as construction of a high-powered station for the Maritimes.

Increased Radio Licenses

Fifty Cent Boost In License For Receiving Sets

Ottawa.—Radio license fees will be increased 50 cents to \$2.50 for the fiscal year starting April 1, it was announced by Transport Minister Howe.

The new regulations also provide a separate license will be required for each receiving set, the present arrangement permitting a license to cover a house and a car radio being cancelled.

The license increase will represent a net revenue of \$650,000 a year to the Canadian Broadcasting Corporation, boosting to \$2,575,660 its income from this source.

The minister said the increased revenue "is required to enable CBC to carry out its program of expansion, particularly in the direction of better programs and more complete coverage."

The corporation, Mr. Rowe said, had improved its services during the year "sufficient to indicate further worthwhile betterments, made possible by increased revenue, will fully justify the new regulations."

"A considerable improvement in coverage already has been effected and the added revenue will enable the corporation to extend similar improvement to the less densely populated areas of Canada," he said. "It is anticipated the hours of broadcasting over the National network, which on Oct. 1, 1937, were increased from six to 12 hours daily, will be further increased."

Tangled In Mid-Air

Two R.C.M.P. Pilots At Halifax Have Narrow Escape

Halifax.—Two pilots of the Royal Canadian Mounted Police, marine division were rescued uninjured from the waters of Tupper Cove after their planes tangled in mid-air and crashed.

Each flying a Halifax Aero Club aircraft, Arthur Lamontagne, of Winnipeg, and Roy Holton, of Ottawa, were in formation when their wings locked. They were able, however, to pancake on the water, avoiding a nose-dive.

One plane sank a few minutes after it hit the water while the other, seriously damaged, was towed to land. The pilots were picked up by a fisherman who rowed them to the Dartmouth shore.

Officials at Halifax said the planes were at an altitude of probably 1,000 feet when their wings locked.

Holton is a student pilot, waiting to take tests for his pilot's license, while Lamontagne is a licensed pilot.

Dead And Missing

Official List Shows 47 Victims Of College Fire

St. Hyacinthe, Que.—In a single column of 47 names, the known dead and the missing in St. Hyacinthe's Sacred Heart College fire were grouped together and marked down officially as dead.

The morgue held 22 bodies, lifted from the college's crumbling ruins after the sudden fire, and another lay at St. Charles hospital mortuary. To this list of death, Coroner Dr. Paul Morin added the names of the 24 missing and opened a blanket inquest over the 47.

Gold Production Up

Ottawa.—The Dominion bureau of statistics reported Canada's production of gold in the first 11 months of 1937 totalled 3,728,960 ounces, an increase of 8.2 per cent, compared with 3,436,270 in the corresponding period in 1936.

A GREAT AVIATOR

Captain Edwin C. Musick, generally conceded to be the foremost aviator in the United States, whose death in the flying boat disaster in the Pacific Ocean, was a severe blow to the United States. Musick, veteran of a quarter of a century of flying, blazed Pan-American air trails over the Pacific Ocean. The South Atlantic and the North Atlantic, and was in command of the Somoan Clipper pioneering a new route from Honolulu to New Zealand.

Urge Commission Inquiry

Congress Of Labor Asks Canadian Government For Action

Ottawa.—Appointment of a royal commission to make a comprehensive survey of physical, human and financial resources of the Dominion as a preliminary to legislation designed to abolish poverty, has been urged upon the Canadian government by the All-Canadian Congress of Labor.

Abolition of poverty was a task for which the government had been given a mandate, the congress declared, and one that was not impossible of achievement. The solution was to be found in a method of equitable distribution among citizens of the products of their labor.

The congress also recommended: Greater protection of the rights of workers to organize for collective bargaining with their employers and penalties for interference with such rights.

Protection of Canadian workers from the activities of foreign labor unions and safeguarding the right of Canadians to establish and maintain their own independent unions.

Government regulation under a transport commission of all forms of transportation of an interprovincial or international character.

Reduction to 10 per cent. of the down payment requirement under the Dominion Housing Act with interest not greater than four per cent. and tax exemption during the repayment period. The down payment is now 20 per cent.

A minimum rate of \$100 a month for all male, full-time employees of the Dominion government.

Epidemic Is Over

Situation Of Indians In Fond Du Lac Greatly Improved

Edmonton.—The epidemic of measles and pneumonia in the Fond du Lac region of northern Saskatchewan, 400 miles northeast of here, has been brought under control, it was reported by Pilot G. McLaren of Mackenzie Air Service. Approximately 30 died in the epidemic.

Pilot McLaren returned to Edmonton after having carried Dr. P. M. Head, of the department of Indian affairs, to different points in the Indian settlement.

Wider Powers For Federal Parliament Opinion Of Congress

Ottawa.—Broadening of Dominion powers over social and labor legislation, to give parliament complete legislative and administrative authority in those fields, was recommended to the Rowell commission by the trades and labor congress of Canada.

To provide increased revenue required by that added responsibility, the congress suggested income and inheritance tax should be made federal.

"A unified plan of social and labor legislation, if adopted by the parliament of Canada, would bring new hope to our less fortunate citizens," said P. M. Draper, congress president.

"It would improve employer-employee relations in the interests of the public and of industry and its employees. It would equalize competition and taxation interprovincially and in general it would follow the world tendency of advancing the welfare of the masses in proportion to the increased production of workers in a machine age."

The congress proposed that Canada should have power to amend its own constitution but that amendments should be neither too easy nor too difficult and that minority rights should be fully protected. It urged periodic examinations of Dominion-provincial relations.

Proposals advanced by the congress included:

Atkin's judgment where he stated: "It is unnecessary to dwell upon the distinction between legislative powers given to the Dominion to perform obligations imposed upon Canada as part of the empire by an imperial executive responsible to and controlled by the imperial parliament, and the legislative power of the Dominion to perform obligations created by the Dominion executive responsible to and controlled by the Dominion parliament."

"As if the people of Canada couldn't be as well protected by their own parliament and executive responsible to it," said Mr. Rowell. "An adequate arrangement."

In his presentation, Prof. Mackenzie urged an amendment to section 132, in view of the privy council decision, to make it clear the Dominion had power to legislate over matters on which the central executive entered into international obligations.

The League of Nations Society was not arguing for or against any certain procedure nor for or against provincial rights or Dominion rights, he said. It was for the best possible adequate arrangements to take care of a most important phase of Canada's external affairs, namely, treaty-making power.

Prof. Mackenzie declared Canada had attained the status of a nation and of an international person, despite the opinion of some of the contrary. International and national courts, as well as governments and constitutional authorities agreed there was a duty on a state to carry out its international obligations.

He said he had studied the constitutions of every federal state but in no case did he find the limitation Lord Atkin suggested in the 1937 decision, that the central government could not make treaties or conventions covering matters ordinarily within jurisdiction of the province or state.

"The only executive competent to bind Canada internationally, with the possible exception of the imperial executive, is the Dominion," Prof. Mackenzie asserted.

The intention of the fathers of confederation was clearly that the Dominion should have that power. It was the only explanation for section 132 being there, he contended, since there was no mention of external affairs as such in the British North America Act.

"The action clearly means that under certain circumstances the Dominion has the power to override provincial rights, and in so doing, if necessary, the Dominion is altering legislative powers as set out in sections 91 and 92," he said. "To hold otherwise would be in effect to hold that section 132 has no meaning and no purpose, and that is clearly unwarranted."

Atkin's judgment where he stated: "It is unnecessary to dwell upon the distinction between legislative powers given to the Dominion to perform obligations imposed upon Canada as part of the empire by an imperial executive responsible to and controlled by the imperial parliament, and the legislative power of the Dominion to perform obligations created by the Dominion executive responsible to and controlled by the Dominion parliament."

"As if the people of Canada couldn't be as well protected by their own parliament and executive responsible to it," said Mr. Rowell. "An adequate arrangement."

In his presentation, Prof. Mackenzie urged an amendment to section 132, in view of the privy council decision, to make it clear the Dominion had power to legislate over matters on which the central executive entered into international obligations.

The League of Nations Society was not arguing for or against any certain procedure nor for or against provincial rights or Dominion rights, he said. It was for the best possible adequate arrangements to take care of a most important phase of Canada's external affairs, namely, treaty-making power.

Prof. Mackenzie declared Canada had attained the status of a nation and of an international person, despite the opinion of some of the contrary. International and national courts, as well as governments and constitutional authorities agreed there was a duty on a state to carry out its international obligations.

Says Government Able To Keep Check On Communism

Ottawa.—Power and facilities were in the hands of the government to regulate the activities of subversive agencies in Canada, and the government knew what was necessary in order to maintain peace and order, Justice Minister Lapointe told the Federation of Catholic Workers of Canada.

That this system of meeting the threat of Communist activities was effective, was proved by the fact Canadians lived in peace and harmony, the minister said. He was dealing with federation recommendations that parliament pass such legislation necessary so that the Communist party can no longer "exist legally in this Dominion."

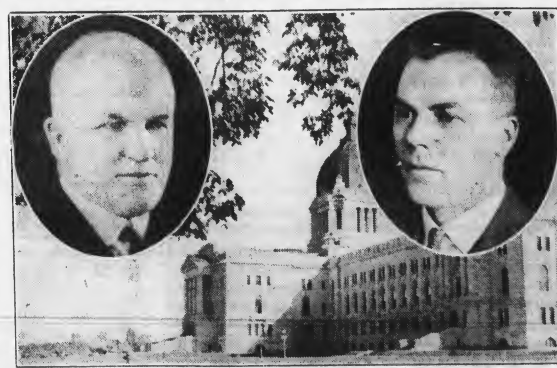

Commenting on the federation's stand against Canadian participation

in foreign conflicts, the minister said no person in Canada wanted to engage in a war but it was the duty of Canadians to take adequate steps to assure their own defence.

The delegation suggested foreign labor organizers be stopped at the border, that Canada take part in no war outside its territory, that the Dominion embark on a vast program of public works and industrial bonuses to assist employment.

Touching on Communism, the federation said the party in times of unrest and discord tried to foment disregard of authority, make appeals to violence, attack the church, and, in a word, do everything possible to shake off the highest sentiments which can originate in the heart of man.

SASKATCHEWAN OPENS LEGISLATURE

Cannon boomed to salute the Lieutenant-Governor of Saskatchewan, Hon. A. P. McNab (left), on January 20th at the opening of the fourth session of the eighth legislature of the Province. Many serious problems will face the members of the Legislature and the Prime Minister, Hon. W. J. Patterson (right), is expected to lead debates on the crop situation, conservation, relief costs, etc. The picture above, in the background, shows the beautiful Parliament Buildings at Regina.

NOTES AND COMMENTS

RADIO LICENSES will be increased to \$2.50 on April 1.

A reduction in taxes instead of an increase would be welcome. If the people of this district enjoyed good reception of C.B.C. programs, there would not be so much objection, but when the majority rely on N.B.C. programs for their entertainment, because most Canadians programs are drowned by U. S. stations, they feel they are paying for something they do not get any advantage or pleasure from. 50c increase may only be a small matter once a year, but people at least should get a semblance of value.

NOTICED in Maclean's "Parade" a lady became so "het up" over mis-pronunciation of certain words that she wrote a letter complaining specifically of the word "dook" for duke, and "noos" for news. She was referring to certain radio announcers. Trifling things such as this, besides newspaper errors, cause more comment than errors of much greater import, which do not come before the public.

HERMAN THOLE, manager of the Lethbridge Maple Leafs, came up last Friday to square himself with President Harry Gardner of Coleman Canadians. Harry apparently got in the first round and told Thole frankly what he thought about his conduct. There was a rumored threat in circulation that unless Thole retracted what he said about the match here on January 17, when his team lost, Canadians would not go to Lethbridge. This would mean a loss to Lethbridge box office, so that it is quite likely that business expediency and better judgment will prevail on Thole's part.

CONCERNING Canadians, there is more credit coming to them than any team in the Kootenay League. Though supposed to be all amateur teams, indirectly many of the players are receiving pay not strictly for the work they do, but for their services as hockey players. This cannot be said of Coleman players, for there are instances of some of them working up till a short time before they were to play, barely having time to change into uniform from their working togs. It makes a difference when it comes to competing with well trained players who enjoy better opportunities for team practices. Yet Coleman players have shown that they compare most favorably with teams of longer senior hockey experience, not even excepting the world-beaters, Kimberley Dynamiters.

THE CURLERS from other towns enlivened the town last week, and the bonspiel was very enjoyable to all who took part. It is a good thing to have visitors, and to accord them a good reception. They return the compliment when the home-town goes to their towns. Good fellowship is engendered and it has a tendency to make a town spruce up so that it appears in a favorable light. That is one of the reasons a service or community club is a desirable organization in a town, which can do much towards promoting the neighborly spirit of goodwill and friendship.

AFTER the council completes its immediate road improvement program, it would be fine if they take action in providing a better system of lighting in the business area of the town. Those crude goose-neck brackets on poles, and there are not sufficient of them to decently light the area, leave a poor impression of a town which has a bigger payroll than any town in southwestern Alberta. The Journal has pointed out on various occasions the necessity for better street lighting, receiving some support in its comment from those who feel that it is a much-needed improvement which should be made as early as possible. If we have to live in a place, by all means make it as cheerful and attractive as possible, and set an example of progress. It would increase local pride. One almost feels like apologising for the lack of light if he drives in after dark with a visitor, especially if the few lights we do possess are not on and the lurid light of the coke ovens is the only illumination. Some ornamental light standards would increase local pride, and every improvement is an incentive to do something better.

ANNUAL MEETINGS of ratepayers usually are not well attended. As long as municipal affairs do not give rise to contention, ratepayers become somewhat indifferent and take the attitude—"Oh, everything's alright; no need to go to the meeting." Yet councillors and trustees give considerable time during the year in the interests of their fellow townsmen; therefore it is very little that is expected in return that interest be shown by attendance at the annual meeting. It is urged that as many as possible be present to hear the reports of the various committees, and to show appreciation of the services of those who accept the responsibility of municipal and school district administration.

A LOCAL retailer has become so "fed up" with non-payment of bills by customers that he threatens to publish their names. One cannot blame him if persuasive effort fails. Patience ceases to be a virtue with chronic debtors.

WORLD HAPPENINGS
BRIEFLY TOLD

If present prices hold, Australia's wool crop will bring \$24,000,000 this year. It is estimated at 100,000 bales larger than any previous crop.

Lord Elton, close friend and confidential adviser of the late Rt. Hon. Ramsay MacDonald, has undertaken to write the former prime minister's biography.

Shoals of jellyfish believed to total 100,000 tons swept into the harbor at Durban, South Africa, by the wind, held up the Union Castle liner, *Dromore Castle*, for a time.

Under a racing bill the New South Wales government intends to introduce, youth under the age of 18 will not be allowed to attend greyhound meetings.

One of the rarest animals at the London Zoo, Sam, the European bison, is dead. It is a distinct loss as it is thought fewer than 100 specimens are left in Europe.

Pushing sales by drawing attention to her goods, Queen Mary earned a reputation as a good saleswoman at a bazaar of antiques in aid of the Personal Service League, of which she is patron.

G. G. McGeer, K.C., Liberal member of parliament for Vancouver-Burrard, will urge early construction of the British Columbia-Alaska highway at the next session of parliament. "It is clearly an international project of the utmost importance," he said.

Japanese medical students will soon be entitled to the degree, bachelor of gas. The Okayama medical college plans to create a chair of poison gas. Students will examine the elements of known gases, study their antidotes—and at attempt to create new types.

Here's how Japanese bombers have been destroying so many Chinese planes lately. The Japanese are keeping a carpenter busy at the side making wooden dummy planes. These are left at night in fields. Japanese flyers come along the next day and blow them up.

Another Success Story

High School Girl Found Her Idea

Was Worth Something

A high school girl in Port Huron was looking around for a way to make her own living instead of leaning on others.

She noticed that many young people in her set were "fed up" on the after-theatre eating places available to them.

And so she borrowed the necessary capital from her father and opened a chicken sandwich shop.

After a year's success she had repaid the loan and now owns the business herself.

Just a repetition of the old, old story.

While others are sitting around and twiddling their thumbs and lamenting that there are no longer opportunities in this country, a girl with an idea steps out and proves that the grouse and defeatists are all wrong—Detroit Free Press.

The Literary Digest sums up the daylight saving issue as follows:

Golfers, gardeners, others, love it. Mothers, milkmen, others, curse it.

"Many have banned jazz. It is the jingles back but evidently it wants them without the jungle music."

FILIN FLON

"The Story of Its Finding and Position To-day"

By FRATT KUHN

The reclaiming processes to be applied in later years when more buildings will be put up, will treat the used cyanide and remains which are stored in barrels on a big dump. Another development will be a furnace to melt down the scrap metals, particularly, which has collected by perhaps thousands of tons, because it costs real money to get iron away up to Filin Flon.

One foundry on the plant premises does nothing but make steel base-balls for the ball crushers and stores them in pyramids outside to be used, worn down to dust, reclaimed, and so on and so on.

While walking round the outside of the smelters I was marveling, however the engineers knew where everything was, so back we went to the chief engineer's office and he showed me the intricate blue prints of every move made since the mine began. Personally, being so ignorant of mining, I guess I'd try to go down the wrong hole at times, but no chance, you're checked, and double-checked all the time and have to report out, or else they don't blast. Rather uncomfortable thought at that, and I rely to pin your ears back or playing around in a mine when they're blasting.

Well, here we've been below, and above, and around Filin Flon but there's lots I've left out. For instance the wonderful electric control system where the power arrives from Island Falls is distributed to do all its work of hauling trains, running elevators, lighting the works and the town, running fans, etc.

The big complete wood working plant where they make everything and men are constantly making leaders for mine use.

Machine shops, repair works, etc. But I want to get to the human element. How are such a lot of husky men happily employed and how do they relieve the tedium of living so far away from city lights.

First of all its fair to say that, even including the high executives, most of the men are an adaptable lot, and perhaps come from towns and farms, nearly 1,000 from Manitoba and Saskatchewan.

Then life is easier. It's reduced to its essentials of food, enough clothing and a comfortable place to sleep.

Men make good money but don't squander it much. If they're married their home buying uses the surplus. If they're not, much money goes back to the old folk on farms where there are no good or where they need that cash.

But the company are more than fair—they're wonderful employers. As a first understanding between themselves and the employees as a mass they have a Welfare club, housed in company premises, but entirely run by the men. The officers elected by them for a year period submit any question of possible dispute, or improvement of operations or what not to the company committee and between them come to a working agreement.

I talked to quite a few of the men and they thought it a swell idea. A paper, now nearing seven years old, *The Bulletin*, is issued monthly, which tells just what the welfare committee has done.

Then there's the Community Club, around which practically all social activities revolve, because it has a membership of 1,235 employees and 50 townspeople. A fee of 10 cents a month or \$5.00 yearly is charged, but women and children are considered members though they pay no fee.

The organization is controlled by a board of directors, elected yearly by the members on a basis of one director for each 250 members or major fraction thereof. The company also appoints directors, on a basis for the number of memberships there are. At the present time there are five elected directors and two appointed.

Canadian Nurses

Capetown's New Hospital Aids For

Twenty To Six Staff

Winifred Perrin and Ruth Webb, formerly of the Hospital for Sick Children, have sailed from New York for Capetown, South Africa. And herein lies a pretty big compliment to our Canadian nurses. A magnificent modern hospital has been built in Capetown and the Canadian Committee of the Nurses' Exchange has been asked to send out 20 Canadian nurses to join the staff there.

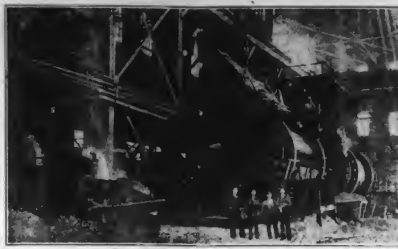

Winifred and Ruth are the first—three more from Edmonton leave in February.

Fifteen more have to be chosen. Our nurses have already made their reputation in South Africa through the Exchange system although this group are going out for as long as they care to stay.

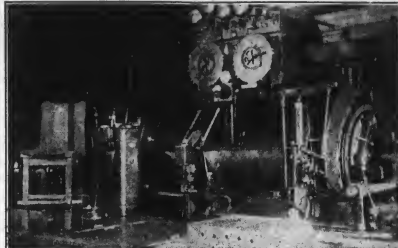

Two years ago, two girls from the Montreal General and one from the University of Alberta hospital changed jobs with three South African nurses for one year, and from all reports they made a good impression. Toronto Telegram.

Movies To Aid Reading

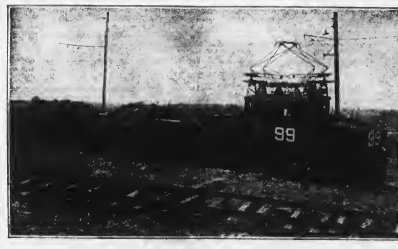

A moving picture film promoting correct eye movement for proper reading technique has been developed by Harvard psychologists. Purpose of the development is to aid adults and children in improving their reading ability.

The Converter floor in the Smelter Dept.

Hoist controls at No. 3 shaft in the Filin Flon mine. The operator can stop his cage on a dime a thousand feet down!

One of the 85-ton electric locomotives which haul two loaded cars of ore up the steep grade of the open pit at one time.

After blasting in the open pit the big electric shovels get busy and dump the loosened ore into the cars on nearby rails.

WARNING—No more men are needed in Filin Flon. There is a waiting list of about 1,000.

The Duchess Of Kent

Has Not Extensive Wardrobe

Favors Colorless Jewels

If you imagine that a Royal Princess has a new dress every day, this clothes analysis of the Duchess of Kent will correct the idea.

She has very few clothes—far fewer than most film stars; no more, in fact, than the average well-to-do woman. She wears the same dress over and over again.

She is the only member of the Royal Family who favors black when not in mourning, and frequently varies her style of hairdress.

Two items of the Duchess's wardrobe are familiar to all who come into frequent contact with her: her furs and her jewels.

"Colorless" jewels, diamonds and pearls, are her favorite stones. She always wears a complete set of jewelry.

Long pendant earrings, diamond clips and bracelets form one of the sets which she often wears in the evenings. Another for less formal occasions consists of large round pearl drops earrings double or triple pearl necklace, and a small pearl ornament.

Almost all her jewelry has a modern platinum setting.

Show Film Spirit

It is characteristic of the spirit of the West that, although hard hit themselves by drought, the people of Saskatchewan contributed generously last year to the assistance of food sufferers in Ontario and along the Mississippi and Ohio rivers. Selfishness has no part in Western life, says the Toronto Globe and Mail.

The Best News Stories

Canadian Editors Agree Coronation

Biggest Event Of 1937

Royalty, romance, war and aviation around the world flared into the headlines of 1937, but in Canada the biggest news was politics.

The Canadian Press asked telegraph editors across the Dominion to name the 10 greatest world news stories of the year, the five best Canadian. Their selections follow:

World news: 1. Coronation of George VI.; 2. Duke of Windsor's wedding; 3. Sino-Japanese fighting; 4. Hindenburg disaster; 5. Amelia Earhart lost; 6. Texas school explosion; 7. Russian transpolar flights; 8. Spanish civil war; 9. Ohio and Mississippi floods; 10. United States automobile strike.

Canadian news: 1. Alberta constitutional question; 2. Oshawa strike; 3. King-Heppner break; 4. Western Ontario floods; 5. Ontario Provincial election.

Fastidious Diner: "Two eggs please. Don't fry them a second after the white is cooked. Don't turn them over. Not too much grease. Just a small pinch of salt on each. No pepper. . . Well, what are you waiting for?"

Waiter: "The hen's name is Betty. Is that all right, sir?"

Japanese and Chinese provide more colonists in the tropics than do white men. The saying is that the white man expects to go home before he dies, while the Chinaman doesn't expect to go home until he dies.

One-fourth of the population of England lives in the London area.

SUNDAY SCHOOL LESSON

JANUARY 30

MINISTERING TO SPIRITUAL NEEDS

Golden text: Son, thy sins are forgiven. Mark 2:5.
Lesson: Mark 2:1-12.
Devotional reading: 32:1-7.

Explanations And Comments

Ministering to Spiritual Needs. Mark 2:1-12. Some days after the events recorded in our last lesson Jesus returned to Capernaum. When it became known that he was within the house at the new, "pressing in with the freedom which is allowed only in the East, filling the room in a trice, then about the house-door (which no doubt opened directly upon the street), and even beyond." As Jesus talked to them, four men approached bearing a paralytic upon his mat.

They were distressed. They were determined to get their patient to the great Physician, and finding the way barred by the crowd they carried him up the outside stairway, tore up a portion of the roof, and let him down before Jesus.

What will Jesus say? "It is a great moment as these two men silently confront each other, the living embodiments of helplessness and of power. The eyes of all are riveted on Jesus—the people with curious expectancy, the four friends with beating hearts and desperate hopes, the scribes with a scowl upon their faces and hate in their hearts." And Jesus seeing their faith, the faith of the four friends who had brought the paralytic, whose belief in Jesus power to heal had made them risk the noise of breaking up the roof, the likelihood of rubbish falling on the people below, and the interruption to the discourse, seeing such faith Jesus could not let it go unrewarded. "What did he say? 'Son, thy sins are forgiven.' A strange thing to say."

Jesus acts in accordance with Jewish ideas of the close connection between sin and sickness, and so of forgiveness and healing. "There is no sick man healed of his sickness," said the rabbis, "until all his sins have been forgiven him."

The scribes present were shocked at Jesus' words. "What does this man mean by talking like this? It is blasphemy!" (Mark's translation). They said to their hearts: "Who can forgive sins but one, even God?" Jesus read their thoughts "like a book," as we say, and turning to them asked: "Why reason ye these things in your hearts? Which is easier, to say to the sick of the palsy, 'Thy sins are forgiven,' or to say, 'Arise and take up thy bed, and walk?' Both were equally easy to say, but one was easier to prove. He would grant the lesser gift of healing that they might believe he could grant the far greater gift of forgiveness of sins, and he turned to the palsied man and bade him arise and walk. When the man obeyed and walked, the scribes and the people all amazed, literally, were beside themselves with wonder, and they acknowledged God's hand in the deed when they exclaimed, 'God, saying in a Mark's translation—'We never saw the like of it!'"

ALICE STEVENS' RECIPES

USE BUILDING FOODS

FOOD GROWING CHILDREN

A healthy child should be growing. This means a gain in height and weight and requires proper building power to be not possible for a child to build a strong body without satisfactory building material.

Because of this growth and demand for building material, a child craves food frequently. At times they do not desire the best foods and the mother needs to watch the diet of her children.

Milk, eggs, fruits and vegetables should be among the foods used regularly. These four foods are excellent sources of mineral matter and vitamins. Milk is considered the most nearly perfect food, but it lacks iron and cellulose. When fruits, such as apples, are used this lack of bulk is supplied.

Natural foods such as fruits and vegetables help to meet these requirements of the growing children. They do not kill the appetite as rich pastries and sweets do. In fact they stimulate the appetite for other foods.

When apples are used freely in the diet of children, they give rosy cheeks. They promote health and replace the medicine cabinet.

Many Canadian housewives are using oranges and other citrus fruits in their diets in places where real apples could be used to better advantage, since apples can be served in greater variety and at lower cost.

One pound of apples yields 290 calories while one pound of oranges yields 240 calories.

Try this diet recipe. The children will like it and it contains foods which are good for building strong healthy bodies. I have a number of other diet recipes which I would be pleased to send you.

APPLE SAGO PUDDING

6 apples
1½ cup sago
3 cups milk
½ cup sugar
1½ teaspoon salt

Wash, peel, core and slice the apples. Put in a baked dish. Add the sago, milk, sugar and salt. Let stand 15 minutes to allow the sago to soak in the milk. Bake in a slow oven until the apples are soft and the sago swelled.

Readers are invited to write to Alice Stevens' Home Service for free advice on home cooking and household problems. Address letters to Winnipeg Newspaper Editor, 175 McDermott Ave. E., Winnipeg, Man.

BE EXTRA CAREFUL

Treat Colds
Proved Way

Doubly proved—in world's largest cold-clinic, and by everyday use in more homes than any other medication of its kind. No "dozing" just mass-vaporub on nose, chest, and back at bedtime. Relief begins almost at once. And long after sleep comes, Vaporub keeps right on working. Its soothing and vapor action loosens phlegm, relieves irritation and coughing, helps break local congestion. Often, by morning the worst of the cold is over.

Cancer From X-Rays

X-ray cancer of the skin never appears as such in the beginning. There is always a long period of inflammation, that is a chronic inflammation of the skin, preceding the development of this type of cancer. This period may last for two or three years and may not develop until months after the last exposure to the rays.

Sometimes this type of cancer appears following the use of the rays in the removal of hairs on the faces of women. Dr. Simone Laborde, the radiologist at the celebrated cancer institute in Ville du Haut hospital in the hospital of Paris, tells of a case of this kind, in a woman who was treated for hypertrichosis (excessive growth of hair) by X-rays in 1916.

"The result," she says, "was perfect at the time and it was not until three or four years after that the characteristic atrophic pigment spots and a tangle of small blood vessels appeared on the chin and borders of the lips. In 1924, ten years after the use of the X-rays, a small ulcer appeared at the edge of the upper lip. This ulcer proved to be a cancer. (Cancer is extremely unusual on the upper lip of a woman). It healed under the use of radium but recurred and had to be treated as late as 1928 and 1934."

In the use of X-rays for such a purpose, the first thing necessary is a competent operator. If accidents of the kind that I referred to are to be avoided, the X-ray operator must have a reasonable knowledge of the dangerous action he is employing. He should know (1) that the initial dermatitis which always precedes X-ray cancer is caused by a small, slightly altered dose repeated at varying intervals over a period of months. (2) That there is always a latent period before a cancer begins. This period may be five or 10 years during which there is always more or less dermatitis. The dermatitis caused by X-rays resembles that caused by the sun in Australia, where cancer supervening on chronic solar dermatitis is a commonplace. These cases are successfully treated by use of the gamma rays of radium, which, unlike the small, undiffused dose of X-rays (which is soft and highly penetrating) is hard and penetrating.

Discovers Huge Forest

Geologist Finds Trees In Heart Of

Australia

A huge forest, covering about 300 square miles, has just been found in the heart of the Australian desert, by P. S. Hensfield, senior geologist to the North Australian Survey.

It is mostly of desert oak and is situated in likely gold-bearing country about 70 miles from "The Granites" goldfield, the scene of the latest "rush". Mr. Hensfield estimates that there are at least two million trees which are valuable for building and mining purposes.—Montreal Star.

Both green and black tea leaves come from the same plant. Their respective color difference is due to the mode of preparation of the leaves before they are marketed.

Good Tonic Pick Up.....

After the FLU most people need a real Tonic to bring the system back to normal.

We can strongly recommend the following:

Neo Chemical Food	\$1.15 and \$2.45
Bynol	\$1.00
Squibb's Adex Tablets	\$1.00 and \$2.50
Kepler's Malt and Cod Liver Oil	85c and \$1.40
Puretest Cod Liver Oil	\$1.00

Local News

Mrs. T. K. MacLean and son Jamie are visiting at Camrose this week.

Mrs. J. Emmerson entertained at bridge on Monday evening and Tuesday afternoon of last week.

Examinations for miners' certificates are expected to be held here next week. Dave Young, mines inspector, and Harry Gardner will be on the examining board.

Mrs. J. McDonald entertained at three tables of bridge on Thursday evening, prize-winners being Mrs. J. O. C. McDonald, first; Mrs. J. Naylor, second, and Mrs. R. Ferguson, consolation.

Mrs. A. Anderson entertained at four tables of bridge on Thursday evening, prize winners being Mrs. S. B. Ryan, first; Mrs. Jack Derbyshire, second; Mrs. A. Beveridge, consolation, and Mrs. J. Lonsbury, travelling prize.

Fred Emery of the Motordrome staff attended a convention of Frigidaire salesman and mechanics this week. The Motordrome has the agency for the Frigidaire corporation in this district.

The Pirates Orchestra, composed of high school students, with Fred Blazenko as leader, will put on a dance on Feb. 11, to raise funds to purchase additional instruments. Their tickets are 50c and 35c, and it would help the boys and would be appreciated if everyone will buy a ticket.

McKeen Hunter came down from Calgary on Monday night to visit here for a few days. It is three years since he went there, following an accident in the mine, which impaired the use of his left arm, and which required long hospital treatment. He has now settled down to life in the city, and is looking very well. "Mac" is one of the early timers of Coleman, coming here from Springhill, Nova Scotia, when Coleman was just a hamlet. Many of his old friends were pleased to meet him and extend the glad hand. He keeps well informed on the doings in Coleman, having been a regular subscriber to The Journal for many years.

Death of Mrs. J. J. Goozee

Mrs. J. J. Goozee, mother of Miss Harriet Goozee, a former high school teacher here, died at Red Deer shortly after Christmas. She was born near Guelph, Ont., in February 1858, and is survived by her husband, and four daughters and one son. They are Mrs. Dora Edwards of Calgary, Miss Effie Goozee of Lacombe high school staff, Miss Harriet Goozee, at home; Rev. Alan Goozee, of Nape, California, and Mrs. L. Sabeau, of New Norway, Alta. She was a member of the Church of the Nazarene, of which she was a deaconess. The service was held at the family home, and burial in Red Deer cemetery.

Funeral of Betty Holly

Many sympathizing friends attended the funeral service for Betty Holly, 14-year-old daughter of Mrs. Wm. Holly, in St. Alban's church on Saturday afternoon. The service was fully choral, Rev. A. S. Partington, rector, officiating. The hymns were "Safely, Safely Gathered In"; "Peace, Perfect Peace," and "Abide With Me." The pall-bearers were Harold Chamberlain, L. Richards, A. McCulloch, S. Ondrus, R. Lloyd and J. Trotz. Many of the school friends of Betty's were at the service, she having been a pupil at Central school.

Card of Thanks

The Canadian Legion, Coleman branch, wishes through this paper to thank all who gave their support so generously to the collection taken for Mrs. W. Holley on Saturday, Jan. 22.

Poetry—By Gum!

The following rhyme sent in by a hockey fan may transgress or ignore the rules of poetry, but it at least expresses her feelings. She asks that her name be not published, merely signing "Bobby." We have not attempted to re-write it, so here it is: To The Coleman Hockey Fans
Lethbridge sat upon a high roost,
My gosh—didn't they boost.
To Coleman they did come
And thought, "Oh my, what fun."

The playing was rare,
O' Viney did stare,
Like the farmer in the dale
He lived to tell the tale.
Coleman won—by gum,
what fun! 4-2.

They came a second time,
I thought I'd make a rhyme.
The game was mellow
When the Lethbridge boys
turned yellow
A goal was shot in,
They said it shouldn't have

been.

A player climbed the net. The goal judge he tried to get. The boys walked off the ice. They should have thought thrice.

With 7½ minutes to go. Our boys waited in a row, Lethbridge boys would not come

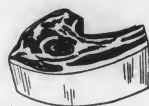

Oh my! Weren't they dumb, Coleman won, by gum
What fun! 4-2.

A Hockey Fan—Bobby

John Lochrie returned last week from Rochester, Minn., after five weeks treatment for acute rheumatism. He brought back with him a piece of poetry composed by one of his sick room patrons, which is held over till next week.

Mrs. J. Nash entertained at bridge on Wednesday evening, six tables being in play.

WARNING TO CUSTOMERS

To customers who are in arrears with their accounts, and who do not even make any attempt to pay.

I will publish their names and the amount owing me, on the front page of this paper.

I am fed up with promises.

Promises do not pay my obligations. I must have the cash. You pay cash for all the luxuries in life; why shouldn't you pay for your food?

Food is what helps to keep one alive, and without it you would not live long enough to enjoy the luxuries of life.

So, to those whom it may concern, beware, or your name will be published on Thursday, February 10, 1938.
